

Bubbler Pot™

Our unique Bubbler Pot®; with a drywell of stone underneath the Bubbler Pot®; is used to discharge the water from the Water Grabber® Bull Dog®; and the patented Water Trek Aqua Route® system - away from the home. Installed in the yard and flush with the grass on the lawn so you can mow right over it. It is colored green to match your lawn. An excellent solution to a tough problem and predicament.

Our unique Bubbler Pot®; with a drywell of stone underneath the Bubbler Pot®; is used to discharge the water from the Water Grabber® Bull Dog®; and the patented Water Trek Aqua Route® system - away from the home. Installed in the yard and flush with the grass on the lawn so you can mow right over it. It is colored green to match your lawn. An excellent solution to a tough problem and predicament.

The water from the Water Grabber® Bull Dog®; and the patented Water Trek Aqua Route® system is discharged through the Freeze Stop®; then to the Bubbler Pot®; typically ten(10) to twenty(20) feet away from the home. The Bubbler Pot®; is installed with a drywell of stone underneath it. Installed in the yard and flush with the grass on the lawn, so you can mow right over it. Some of the water, dependent upon soil conditions, may "bubble" up from the lid. It is colored green to match your lawn. An excellent solution to a tough problem and predicament.
