

Floor Grate

Installed on the inside of the bulkhead and garage doors. Designed to catch and divert water from the exterior of the bulkhead or driveway and route it to the interior sub-floor system. The design insures water will not get on the floor inside the basement or garage.

"Trust your home to the leading name in the basement waterproofing industry … Basement Technologies, Inc."

The Floor Grate™

Basement Technologies' patent pending floor grate is installed on the inside of the bulkhead and garage doors. Designed to catch and divert water from the exterior of the bulkhead or driveway and route it to the interior sub-floor system. The design insures water will not get on the floor inside the basement or garage. The Floor Grate™ is installed with our patented Water Trek Aqua Route® and our patent pending Water Grabber ®Bull Dog™ sump pump system.
